BWJ Tech Solutions Private Limited is a leading and innovative digital technology company, specializing in providing intelligent and customized solutions that help businesses transform and thrive in today's competitive world. One of our greatest strengths is the ability to deliver tailor-made digital solutions, empowering organizations to design systems according to their unique business needs.

Since our inception, we have partnered with clients across industries, delivering enterprise-grade websites, mobile applications, ERP solutions, AI-driven platforms, and digital ecosystems. Our expertise combines technology, creativity, and strategy, enabling us to work with companies worldwide and provide transformative solutions that are both future-ready and sustainable.

Innovation at the Core

At BWJ, Innovation is more than just a buzzword — it is the driving force behind everything we do. Our digital products and platforms are designed with powerful analytics, intelligent workflows, and creative process automation, enabling businesses to make data-driven decisions and stay competitive.

We also leverage AI, IoT, Blockchain, and Cloud technologies to deliver scalable solutions that transform how businesses operate. Our focus is always on creating human-centric, secure, and sustainable digital ecosystems that generate long-term value.

Commitment to Excellence

BWJ Tech Solutions works as a true partner in progress with its clients. We don't just deliver projects — we collaborate, innovate, and co-create solutions that solve real business challenges. Our comprehensive approach allows us to integrate seamlessly into our clients' operations, understand their unique challenges, and deliver measurable results.

We believe in building long-term relationships based on trust, innovation, and performance. With every project, our goal is to help organizations improve efficiency, enhance customer experiences, and achieve sustainable competitive advantage.

Our Vision

To be a global leader in digital transformation by empowering businesses with intelligent, sustainable, and future-ready solutions. We aim to redefine how technology integrates into daily operations, creating a digital ecosystem where innovation, efficiency, and sustainability coexist to transform businesses into smart enterprises.

Our Mission

To deliver cutting-edge digital solutions that intelligently blend technology, creativity, and strategy to fuel business growth. We are committed to helping clients navigate the evolving digital landscape through comprehensive services—including web development, mobile applications, digital marketing, IoT, and smart business solutions. Through a client-centric approach and continuous innovation, we transform organizations into future-proof enterprises..

Our Values

Innovation: We place innovation at the heart of everything we do.

Integrity & Trust: We build lasting relationships through transparency and ethical practices

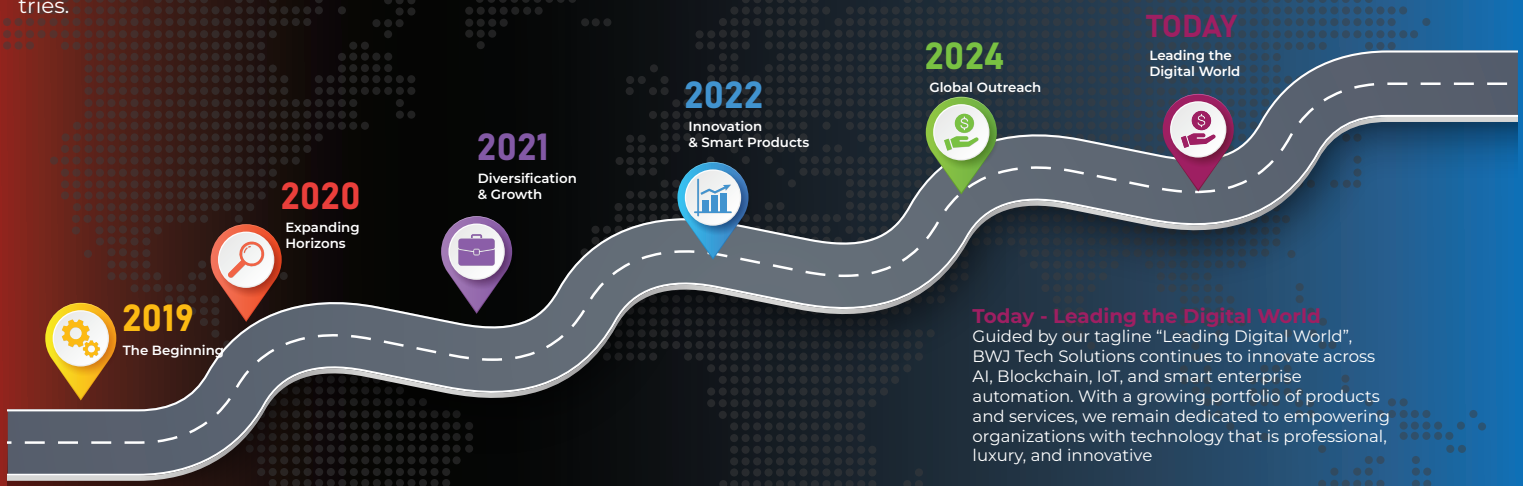
Excellence: We deliver tailored solutions with precision and a focus on quality.

Sustainability: We ensure our technologies create a positive impact on both business and society.

Collaboration: we believe in teamwork to drive shared growth and success

Our Journey

Since its inception, BWJ Tech Solutions Private Limited has been committed to transforming businesses through technology and innovation. What started as a small software initiative has now evolved into a trusted technology partner for enterprises across industries.



2019 – The Beginning

BWJ Tech Solutions was founded with a vision to build smart, reliable, and affordable digital solutions for businesses. Our early projects focused on web development and custom software for small and medium enterprises.

2020 – Expanding Horizons

We introduced enterprise-grade software solutions, strengthening our expertise in ERP systems, internal audit automation, and business management tools. During this phase, we began building long-term partnerships with manufacturing industries and service providers.

2021 – Diversification & Growth

As businesses moved toward digital transformation, we diversified into mobile applications, KYC onboarding solutions, and cloud-based platforms. Our solutions were designed to help clients improve compliance, streamline operations, and enhance customer experiences.

2022 – Innovation & Smart Products

With innovation at our core, we launched Snaplinkr, our smart NFC business card solution, aimed at professionals and enterprises. We also expanded into IoT-based air quality monitoring systems for factories, helping industries achieve environmental compliance and workplace safety.

2024 – Global Outreach

Our solutions gained recognition beyond India, and we proudly served clients in international markets. From enterprise white-labeling services to custom ERP integrations with SAP, our team successfully delivered cutting-edge projects across diverse sectors.

Today - Leading the Digital World

Guided by our tagline “Leading Digital World”, BWJ Tech Solutions continues to innovate across AI, Blockchain, IoT, and smart enterprise automation. With a growing portfolio of products and services, we remain dedicated to empowering organizations with technology that is professional, luxury, and innovative

Innovative IoT solutions to connect, monitor, and automate processes. Driving smart decision-making and operational efficiency.

Digitization

Transforming traditional business processes into digital ecosystems. Enabling faster, smarter, and more efficient workflows.

UI/UX Designing

Creative and user-centric designs that elevate digital experiences. We focus on usability, aesthetics, and customer satisfaction.

“DEDICATION IS THE FOUNDATION
KEY TO ALL SUCCESS.”

OUR ROAD MAP
TO BUILD A PROJECT

OUR PRODUCTS

LETS GET INTRODUCED
TO OUR PRODUCTS

SnapLinkr unifies the power of Digital Business Cards, NFC Card Sharing, and Business Card Scanning into one seamless platform. Whether you're creating a visually rich digital card packed with interactive content, tapping to share instantly with an NFC-enabled card, or scanning traditional paper cards into your digital network, SnapLinkr has you covered. With full CRM integration, customizable branding, and smart lead capture tools, it transforms how professionals network—effortless, intelligent, and future-ready.

SnapLinkr

Payvion

PayVion is a comprehensive payroll and HR management system that unifies employee management, salary processing, attendance, leave, and reimbursement into a single platform. Built for scalability, security, and ease of use, it minimizes manual errors, enforces compliance, and boosts productivity. Its modular design ensures flexibility, while real-time dashboards empower every role — from employees to admins — to perform tasks efficiently with transparency and accuracy.

Qcom is a powerful, Laravel-based eCommerce platform offering a dynamic homepage, multilingual and RTL content support, responsive design, custom pages, and a multivendor system. It supports various payment gateways and rich frontend management capabilities. The platform also features a wide ecosystem of mobile apps and premium add-ons—ranging from affiliate systems to POS and wholesale modules.

QCOM

Built a corporate event seat booking system with real-time seat visualization, OTP-based login, and one-seat-per-user booking. QR-based contactless check-in, admin dashboards, and attendance analytics streamlined event operations. The solution reduced queues by 70% and delivered a seamless event experience.

SeatVista

chalo school
SAAS VERSION

Chalo School SaaS is a complete digital school management platform designed to simplify academics, administration, and communication. It centralizes student, teacher, attendance, exams, fees, and staff operations while offering tools like assignments, announcements, chat, certificates, and website management. The solution improves efficiency, transparency, and engagement across the entire school ecosystem.

A simple and powerful restaurant/grocery/clothing stores POS solution that enables QR-code menus and contactless ordering, integrated with secure payment gateways like Stripe and Razorpay. It offers complete POS functionality with staff-wise logins, custom floor plans, kitchen order tickets (KOT), and fast bill printing. Built-in reports provide data-driven insights to improve operations, efficiency, and customer experience.

OUR SOLUTIONS

WE DON'T JUST BUILD SOFTWARE
WE CRAFT **INTELLIGENT, FUTURE-READY** SOLUTIONS
THAT SIMPLIFY COMPLEXITY, **SAVE TIME**, AND
EMPOWER BUSINESSES TO **GROW SMARTER** EVERY DAY.

AMS
Audit Management System

Built a centralized audit and compliance platform with automated workflows, role-based access, and multi-location support. Real-time dashboards, analytics, and reports improved visibility, governance, and risk tracking. The solution reduced manual audit effort by ~50% while enhancing transparency and control.

VMS
Visitor Management System

Developed a secure visitor management system with OTP-based approvals, image verification, and real-time check-in/out tracking. Dashboards, alerts, and restricted-area monitoring replaced manual registers and strengthened access control. The solution reduced entry processing time by 70% while improving security and compliance.

CRS
Cab Requisition System

Built a digital cab management system covering requests, approvals, vendor assignment, and ride tracking with automated workflows. Real-time dashboards, analytics, and multi-role workflows improved visibility, accountability, and scalability. The solution enhanced approval speed and reduced overall transport costs by 40%.

QTC
Quality Test Certificate

Developed a secure quality management system for generating and validating digital test certificates with automated approvals. Digital signatures, QR-based verification, and locked records ensured accuracy and compliance. The solution reduced certificate processing effort by 80% while improving speed and reliability.

KYC

Know your Customer

The KYC Portal is a centralized platform that streamlines customer KYC submission and multi-level approvals through secure links and controlled workflows. It ensures accurate verification, audit-ready compliance, and clear decision-making across all approval stages. Final approval automatically triggers SAP code creation, reducing turnaround time and improving operational efficiency

BS

BrandShop

Brandshop is a centralized dealer onboarding platform that automates multi-level approvals across branches and roles. It replaces manual processes with secure digital workflows, real-time dashboards, and centralized document management. The solution reduced onboarding time by up to 80% while improving compliance accuracy and management visibility.

SAFETY PORTAL

This is a centralized workplace safety and incident management platform with a mobile-first reporting workflow for employees and guests. It replaces manual processes with real-time submissions, evidence capture, automated alerts, and role-based action tracking. The solution improves response times, strengthens compliance, and provides complete visibility into safety issues.

QC

Quality Checker

The QC App is a digital inspection platform that replaces manual, Excel-based quality checks with a centralized web and mobile solution. It enables real-time defect classification, image capture, and full inspection traceability with live visibility for management. The solution reduces inspection cycle time, improves compliance accuracy, and streamlines quality operations.

TT
Ticketing Tool

Built a centralized helpdesk system to manage IT and operational support tickets with structured workflows and collaboration. SLA tracking, escalations, and real-time dashboards improved visibility, accountability, and performance. The solution reduced resolution time by 60% while enhancing service quality.

FRM
Field Reporting & Monitoring

Developed a field reporting system to track daily pickup and travel activities with role-based access and validations. Real-time dashboards, analytics, and location-based controls improved managerial visibility and governance. The solution enhanced reporting accuracy, transparency, and overall operational control.

MILAN

The Milan app is a digital gift distribution tracking system that replaces manual registers with structured request, approval, and dispatch workflows. Role-based dashboards provide real-time visibility into allocations, recipients, and budget utilization. The solution improves transparency, audit readiness, and control over promotional spending.

AH
App Hub
OneLogin

Developed a single sign-on platform providing centralized access to all organizational applications using Azure AD authentication. Personalized dashboards, role-based permissions, and access analytics improved usability and IT governance. The solution reduced login effort by 80% while significantly boosting employee productivity.
